Community of Coders with CE & IT Department

presents

D-CRYPT

EDITION 3
JULY-DECEMBER 2020

The department of computer technology was established in 1985 to cater to the need for trained person power in Information Technology. Starting with a Master of Computer Applications in 1985, the department now has Bachelor of Computer Engineering and a Master of Computer Engineering. A degree course in Information Technology was introduced in the year 2001.

The department is located in the southern wing on the ground, first and third floor and is supported by a well equipped Computer Center in the Quadrangle.

State of the art computing laboratories are equipped with the latest machines, software and are networked to the client machines throughout the department. Emphasis is laid on the fundamentals of computer science and engineering supported by laboratory practicals.

VISION

To become the world-class student-centered department that fosters high-quality learning and research for both undergraduate and graduate students

MISSION

To equip our graduates with the knowledge and expertise to contribute significantly to the knowledge and information industry and to continue to grow professionally

To collaborate with local, state, national, and international entities in education and research

To engage faculty, students and alumni in research activities

To nurture our graduate's interpersonal and entrepreneurial skills so they can provide leadership within the information industry's diverse culture

>Community of Coders;

For those who need mentoring and help, those who need a collaborative environment where they can learn from friendly and familiar faces, and those who want to be good software engineers and help others achieve the same, the Community of Coders was formed.

Currently, in its fifth year, CoC is a student-run organization aimed at cultivating and nurturing talents in the fields of programming and software development, through community bonding, peer discussions, and active cooperation with seniors.

CoC is a community of people willing to help each other gain knowledge and pursue ideas.

It truly upholds its motto - "By the seniors, for the juniors".

The three bits of CoC say: IMAGINE. BELIEVE. ACHIEVE.

What we learned through the committee's principles is to build a team, share knowledge, get acquainted with the current trends, and polish our skill set.

We are still excited at every opportunity to not only learn from the members about their cool projects and ideas but also contribute back to the community whenever and however possible.
